Anti Set-Off Powder Silux 35

Category: Auxiliary Materials
Availability: **estimated time of delivery 17.11.2026**
code: **381**

Price: 0,00€

Quantity: 1 kg, 3,5 kg

Short description

BöttcherPro Silux 35 is a high-performance spray powder engineered for use with conventional printing inks and water-based varnishes, making it suitable for a range of applications including subsequent laminating, coating, and inline coating with water-based dispersion coatings.

Key Features:
• Uniform Grain Size: Ensures consistent application, enhancing flow properties and preventing spray nozzle clogging.
• Smooth Finish: Delivers a smooth finish with retained gloss, essential for high-quality printing results.
• Low Build-Up: Reduces the accumulation on blankets, promoting efficient operations in high-volume production.
• Humidity Resistant: Performs well in humid conditions without causing surface scrubbing, maintaining the integrity of the printed material.
• Versatile Usage: Suitable for all spray powder application systems and effective on printing materials up to 350 g/m².
• Health and Safety: Formulated from vegetable starch, this gluten-free powder is safe for use, fine dust reduced, and approved by BG ETEM. It is also packaged in a user-friendly reclosable stand-up pouch for easy handling.
Applications: Ideal for printers who require a reliable and efficient solution for inline coating and subsequent laminating or coating processes. BöttcherPro Silux 35 is perfect for ensuring trouble-free processing with low consumption, particularly on substrates up to 350 g/m², where high standards of finish and functionality are crucial.
